January 12th – The Green Zone with David Suzuki – 47 minutes – Interesting story of Canada's efforts to restore riparian zones and Atlantic salmon fisheries. Incredible historic footage of the unusual event of Hurricane Hazel hitting the eastern coast of Canada.

February 9th – FLOW – 90 minutes – Award-winning documentary investigation into what experts label the most important political and environmental issue of the 21st Century - The World Water Crisis. Interviews with scientists and activists intelligently reveal the rapidly building crisis, at both the global and human scale, and the film introduces many of the governmental and corporate culprits behind the water grab. March 9th – Water Before Anything – 40 minutes – A documentary made by OSU Graduate Student Sarah Sheldrick with financial backing from the Institute for Water and Watersheds. This film tells the story of the Umatilla County Critical Groundwater Solutions Taskforce, a volunteer group that has been working to enhance and protect groundwater in the Umatilla Basin. View the four minute trailer at Google Video. Come meet Sarah!

April 13th – Liquid Assets – 90 minutes – This film explores the history, engineering, and political and economic challenges of our water infrastructure, and engages communities in local discussion about public water and wastewater issues. View the trailer at <http://liquidassets.psu.edu/>. The Surfrider Foundation co-produced this film and will lead a follow-up discussion.

May 11th – Celilo Falls and the Remaking of the Columbia River – 29 minutes – Through a combination of rare historic films and photographs, this film provides a glimpse of the life at Celilo as it once was and considers the cultural, social, and political forces that brought about its end, signaling a new era in the relationship between people and nature. Joe Cone, the producer of the film, will be there to entertain any questions.
